

Integrating Stream Restoration into Pennsylvania's PRPs and Phase III WIPs

Provided by the Center for Watershed Protection, Inc. and
Ecosystem Planning & Restoration

PURPOSE: To provide training to improve understanding of how to use and apply the Chesapeake Bay Program Stream Restoration crediting protocols towards TMDL and Pollution Reduction Plan targets, to address FAQs about how to implement the protocols and how they will be affected by the new Phase 6 Chesapeake Bay Watershed Model, and to provide guidance on how to rapidly determine suitable candidates for stream restoration. The workshop will be classroom based and include lectures and hands-on exercises. Participants will also learn about site selection and assessment methods to rapidly evaluate existing stream conditions, recommend potential stream restoration solutions, and evaluate the feasibility of potential stream restoration projects for project implementation prioritization.

December 11th, 2017 8:00 AM – 4:00 PM

Upper Allen Township Office, 100 Gettysburg Pike, Mechanicsville, PA

Register online until December 1st

Space is limited. Secure your place today and register early online at:

<https://www.cwp.org/events/integrating-stream-restoration-pennsylvanias-prps-phase-iii-wips/>
