AQUARIUM

ATLANTIC WHITE CEDAR TREE PLANTING

Saturday, March 24, 2018 | 9 am

WHAT Join the National Aquarium Conservation Team in partnership with The Nature Conservancy and the Chesapeake Bay Trust to restore Atlantic white cedar habitat in Nassawango Creek Preserve. The 15-square-mile preserve is comprised of wetland and upland habitat and is home to 60 species of migratory birds and a number of rare plant species. This planting is part of an ongoing restoration effort through the Aquarium's Atlantic White Cedar Program, which encourages students in Worcester and Somerset counties to become environmental stewards through hands-on opportunities to care for trees in a nursery pond on their school grounds.

WHERE Nassawango Creek Preserve, Snow Hill, Maryland

HOW Pre-registration is required for this event. Volunteer space is limited and registration will close when the event is full. Participants must be at least 10 years old. All volunteers under 18 must be supervised by an adult. Please contact us at conserve@aquarium.org or 410-576-1014 for more information.
