Company Overview:

Ecosystem Services is a natural resource consulting firm with an interdisciplinary staff that includes ecologists, environmental scientists, and engineers. Our work is primarily in the mid-Atlantic and Southeast regions and we specialize in ecological restoration, environmental banking, stormwater management, and regulatory permitting.

Our goal is to support each employee with the resources needed to excel in his or her role for the benefit of the individual, the company, and the environment. Our company is structured so that each employee manages their own schedule and responsibilities and coordinates with their colleagues within project Teams. This gives every employee the autonomy and authority to succeed without arbitrary or hierarchical constraints.
