HORSESHOE CRAB SURVEYS

Do you live in/near Oxford, Maryland? Join the National Wildlife Federation to survey for horseshoe crabs in Oxford and learn about an upcoming shoreline resilience project. Surveys occur in late May and June, with flexible dates around the new and full moons. These surveys will help us identify whether the project is successful at increasing available horseshoe crab nesting habitat.

Survey protocols are simple to learn and training and materials will be provided. **Contact Amanda Poskaitis at 443-842-7529 or poskaitisa@nwf.org to learn more and sign up.**
