

**SMARTER SALTING
CLEANER WATERS
HEALTHY ECOSYSTEMS**

Learn how to reduce salt use, protect infrastructure, and safeguard ecosystems — without compromising safety.

**October 9, 2026
8:00am - 2:30pm**

Lower Allen Township

2233 Gettysburg Road, Camp Hill, PA 17011

Course Topics Include:

- The environmental and public health impacts of deicing materials
- Overview of ice melter types, including advantages and limitations
- Determining appropriate application rates and accurate material calculations
- Benefits of brine pre-treatment and proper application methods
- Best practices for equipment calibration to ensure efficient and effective salt use
- Cost savings and analysis of equipment and materials

**Price: \$200
Lunch Included!**

Through support from POWR, a limited number of free registrations are available for watershed organizations, nonprofits, and volunteers, along with a small number of 50% hardship scholarships. Visit the registration page for details.

Offered in collaboration with the Pennsylvania Organization of Watersheds and Rivers
